Career Objective

A passionate and detail-oriented B.Tech student specializing in Computer Science Engineering (Artificial Intelligence & Machine Learning), with a strong academic foundation in software development, networking, and embedded systems. I am keen to apply my knowledge and technical skills to develop innovative solutions in the fields of AI, multimedia systems, and real-time technologies.

Education

2022–2026	B.Tech in CSE (AI & ML), Bhoj Reddy Engineering College for Women, Hyderabad	CGPA: 7.34
2020–2022	MIMS Junior College, Mancherial	Percentage: 88.4%
2019–2020	TSWRIES Luxettipet	CGPA: 10.0

Technical Skills

Languages:	C, C++, Java (OOP), Python, JavaScript
Web:	HTML, CSS
Database:	MySQL
Tools:	Git, GitHub, VS Code, Jupyter Notebook, StarUML
Concepts:	OS Fundamentals, DBMS, Networking, Object-Oriented Programming

Projects

Identifying Suspects using AI and ML

Python, CNN, OpenCV

Built a computer vision model using CNNs to identify faces from a surveillance dataset. Optimized training pipelines and improved inference performance.

Real-Time Audio Command Recognition System

C++, PortAudio, Signal Processing

Developed a real-time voice command recognition tool using C++ and PortAudio. Captured microphone input and processed audio signals to recognize specific commands like “start”, “stop”, and “pause”. Focused on low-latency processing and basic signal filtering to simulate embedded speech interface behavior.

Student Attendance Prediction using ML

Python, Scikit-learn, Pandas

Developed a supervised classification model to forecast student attendance trends using historical data and implemented key metrics for model evaluation.

Portfolio Website (Live)

HTML, CSS, JavaScript

Designed and deployed a fully responsive website to showcase projects and technical skills using GitHub Pages.

Internships

Web Development Intern – YHills Edutech (Virtual)

- Designed a **Task Tracker Web App** with interactive UI and persistent data storage using JavaScript and DOM manipulation.
- Created a responsive **Pizza Store Application** using React.js with modular component-based architecture.

Certifications

- **Python Essentials 1** – Cisco Networking Academy, EdCreate Foundation (July 24, 2025)
- **Python Essentials 2** – Cisco Networking Academy, EdCreate Foundation (July 25, 2025)
- **Introduction to Natural Language Processing** – Infosys Springboard (June 3, 2025)
- **Network Defense** – Cisco Networking Academy (July 2025)
- **Java Foundation** – Infosys Springboard (June 2025)
- **Crash Course on Python** – Coursera (Google)
- **Exploratory Data Analysis for ML** – Coursera (IBM)
- **Artificial Intelligence Fundamentals** – Credly
- **Project Certificate (IJESR)** – Identifying Suspects Using AI

Workshops & Hackathons

- Hackathon on Data Analytics using R – Bhoj Reddy Engineering College
- R Programming Workshop – Bhoj Reddy Engineering College

Hobbies

- Exploring emerging tech in AI, 5G, and IoT
- Playing chess and problem-solving games
- Building real-world software projects

Declaration

I hereby declare that the information provided above is true to the best of my knowledge.

Place: Hyderabad
